Awalnya burnout! Cari alternatif

- Merintis bisnis tech di kota kecil ga gampang. Tetep harus bolak balik ke Jakarta ketemu klien networking.
- 5 jam (sumedang-jakarta) pake bis. Belum ada Woosh waktu itu.
- Belum mau pindah ke Jakarta
- Harus kerja di 2 tempat (bisnis dan full-time) untuk bisa dapet standar hidup yang dipengenin.
- Jadi ngerasa kurang punya work-life balance
- Cari tempat baru kali ya...

Negara paling bahagia

- Cari alternatif biar lebih bahagia dan cari work-life balance
- Negara paling bahagia selalu muncul Scandinavian/Nordic. Termasuk Swedia  Why?
- Kesejahteraan Sosial, Kesetaraan dan Inklusivitas, Keseimbangan Kehidupan-Kerja, Koneksi dengan Alam, Kepercayaan pada Institusi, Kualitas Hidup yang Tinggi.

 Backend Developer (Node.js) @ Viaplay?

Hi Sutisna Hope you are doing well.

We have an opening as Backend Developer with one of our cross-functional product teams working with the development of the leading streaming service in the nordics; Viaplay. We work with Node.js (and some Java) in a micro-services architecture that runs serverless in AWS. Also, we build our whole product here in-house.

I came across your profile and decided to approach you since I think that your experience looks really impressive for this role! Ideally we are looking for someone that is well versed in the Node.js landscape but who is not afraid to try out new programming languages. Also, someone that has an extra interest for problem solving regarding performance, resilience, scalability etc., and feels comfortable and enjoy working in an open climate where you find solutions to problems together.

We are a Scandinavian media & streaming company with a down-to-earth atmosphere, managers that truly cares about work-life balance, and giving you the freedom to try new things and develop!

- 22 Nov 2022 first day at the office Stockholm

Lesson learned: Follow up linkedin message, cek dan pelajari dl. Ga semua tipu-tipu.

Hi Fatima,

Thank you for reaching out to me. I was very excited to receive an email from you about the job opening as a Backend Developer at your company. As a software engineer with over ten years of professional experience, I'm confident I would significantly contribute to Viaplay Group's team.

Your job listing mentions a need for someone experienced in developing web based services using Node.js, a good understanding of REST API, and experience in developing services in AWS. I'm currently employed at Jakarta Smart City (JSC) under Jakarta Capital City Government, where I've honed my skills by building API/microservices for mission-critical digital public services for more than 11 million Jakarta citizens. My latest works including to develop an integrated COVID-19 vaccine registration system on Jakarta's super app, Jakarta Kini (JAKI). Creating a COVID-19 vaccine registration system for millions of Jakarta citizens gave me the experience of working with a high transactional end-user product. In addition, I have experience in deploying, utilizing, and

Culture shock nya apa
aja tinggal di Swedia?

Ternyata Swedia beneran 😢:

- Winternya gelap, lama, dingin. Kelam😂
- Tapi lampu xmas dimana-mana bikin sedikit cheer up
- Mahal ya biaya hidup.
- Potongan pajak berasa banget jumlahnya. Tp sekarang udah merem aja. Bisa sih survive tp susah kaya (tergantung life style sih) tp kan gw hedon
- Ternyata tetap harus belajar bahasa lokal untuk sepenuhnya berintegrasi.

Ternyata Swedia beneran 😍:

- Menerapkan hidup berkelanjutan dan ramah lingkungan
- Baik banget sama parents: banyak cuti, tunjangan anak, sekolah anak gratis, layanan dukungan buat perkembangan anak lengkap.
- Beneran accessible ke alam dan ruang terbuka walaupun hidup di tengah kota sekalipun.
- Work-life balance nya beneran berasa
- Kesetaraan di kantor juga berasa. Hirarki nya lebih flat
- Sistem pensiunnya oke
- Saat ini masih ada di tahap masih ngerasa pindah ke Swedia jadi alternatif terbaik buat gw.
